

WINTER MOVEMENT CARDS

WINTER movement cards

by Little Sprouts Learning

Incorporating exercise and movement throughout the school day makes students less fidgety and more focused on learning. Improving on-task behavior and reducing classroom management challenges are among the most obvious benefits of adding physical activities to your teaching toolkit.

This movement card set is designed to engage children in movement using fine and gross motor skills while learning about the words related to the theme of the cards. It is my hope this movement card set will aid you and your students as a start to your day, brain breaks or as a transitioning activity.
